Question

Suppose the Web consists of a clique (set of nodes with all possible arcs from one to another) of n nodes and a single additional node that is the successor of each of the n nodes in the clique.

Determine the PageRank of each page, as a function of n and β . While computing pagerank, assume the pagerank of each of the node in the clique as x and the pagerank for the extra added node as y . Identify all the correct statements.

4. Options

1 point

Check all that apply.

- ☐ The pagerank x is 0.1923
- ☐ The pagerank y is 0.2308
- ☐ The pagerank x is 0.2308
- ☐ The pagerank y is 0.1923
- ☐ The value y shall always be greater than x .
- ☐ The value x shall always be greater than y .
